

**Tender for Supply and Delivery of Portable High Pressure
Air Compressor Unit For SWA Drill Rig for Borehole Programme in Samoa**

Ref. No. WASSP PE5/001

Clarification No.1

Query 1 : Free-Air Delivery (Volumetric Flow Capacity) of 850 to 1,100 cubic feet per minute (cfm) with minimum to maximum capacity control.

Do you mean it can be any size between 850 cfm to 1100 cfm? Or do you mean you need a unit that is adjustable from 850 cfm to 1100 cfm?

Response 1 : The compressor unit must be able to deliver both high capacity /high pressure (1100 cfm / 120 psi) and lower-capacity/higher pressure (900 cfm / 350 psi) with 0 to 100% adjustable control.

Query 2: Rated Operating Pressure Range of 120 to 350 pounds per square inch (psi) with minimum to maximum capacity control.

Do you mean it can be any size between 125 psi to 350 psi? Or do you mean you need a unit that is adjustable from 120 psi to 350 psi?

Response 2 : The compressor unit must be able to deliver both high capacity /high pressure (1100 cfm / 120 psi) and lower-capacity/higher pressure (900 cfm / 350 psi) with 0 to 100% adjustable control.

Query 3: And finally, if we can offer 350 PSI / 1250 CFM, would that be acceptable?

Response 3 : No, The compressor unit is to meet the required specifications provided in the Tender dossier.
